Completion of Safety File

On-site Safety Officer

Safety Statements

Training:

Confined Space

Forklift

Manual Handling

MEWP

Fire Safety Training

Emergency Response

First Aid

Abrasive Wheels

Working at Heights

Safe Use and Operation of **Mobile Elevated Working Platforms** **(M.E.W.P.)** **Telescopic and Scissors**

Aim:

To give the participants the skill and knowledge required to operate an MEWP safely and effectively.

Course Objectives:

On completion of this course, participants will be able to:

1. Carry out pre use checks
2. Refuel/recharge MEWPS safely
3. Operate a MEWP safely, reducing the risk of damage or injury to operators and pedestrians
4. Use safe operating techniques
5. Correctly position MEWPS in relation to task requirements
6. Identify hazards associated with the use of MEWP
7. Identify the maximum load that the MEWP will support

Course Summary:

- Induction
- Safety Awareness
- Safety Devices, stabilizers
- Manoeuvring
- Safe Working Loads
- Ground Conditions
- Elevating – Identifying overhead hazards

Equipment:

Machine must be in good order with all relevant current and valid certifications of inspections.

There must be a safe area for practical skills.

All delegates must have Safety Boots, Overalls, Hard Hats and Certified Harnesses on the days of the training.

Duration: 1 Day

Delegates: 4 Maximum if Beginner - 6 if refresher

Certification: On successful completion of this course a Trade Safety Ltd Training Certificate & Card will be issued.
