Data sheet

IGNITE PROTON WIND

With back pad wear plate and frontal attachment point.

The IGNITE PROTON is the evolution of our popular ARG 51 to a higher level. A safety harness with an elaborate and thought-out design with thermoformed hip padding AIRPAD and sophisticated construction leaves nothing to be desired in terms of comfort and usability. The sternal attachment point can be positioned perfectly according to the user's body type. Anatomically preformed shoulder and leg padding clings to the body and distributes the load optimally. Excess belt strap is no longer a disturbing factor due to practical belt strap coiling with fixation.The harness comes with preformed gear loops and tool loops for any user requirement.

Scores with comfort, colour concept and design: - ergonomic high-tech padding AIRPAD - colour coding to identify the main anchoring points

- tool loops and gear loops for every purpose
