

EASY-TO-USE HARNESS TO WORK POSITIONING, PROTECTING AGAINST FALLS

The P-600 is a safety harness integrated with a supporting belt. Made on the basis of the PRO-FIT construction, which enables quick installation and adjustment of the harness to the user's figure. The vest made of mesh allows the skin to breathe freely and prevents sweating, guaranteeing comfort at work.

The P-600 are equipped with 3 attachment points. The rear one in the form of an aluminum D buckle and two front ones: thoracic and abdominal in the form of a pair of interlocking loops. The Abdominal Attachment Point is intended for use with vertical fall arrest systems. During operation, the load is evenly distributed over the belt, ensuring optimal comfort. During a fall, the hooking point moves up to the level of the chest, ensuring a vertical position of the body after stopping the fall. The harness also has fall indicators which automatically rip open to indicate the necessity of withdrawing the harness from use.

SPECIFICATION

The PRO-FIT cut for easy donning and guaranteeing a fit
 Optimum freedom of movement
 Work comfort: lightweight, breathable material (mesh)
 Automatic buckles (belt and thighs)
 Hitch loops for front and rear
 Buckles for work in support
 Hitch loop for work on the rail
 Fall indicator
 3 hitch loops: front, rear, front - rail
 2 equipment loops
 Adjustment shoulder straps, belt and thigh straps
 Sizes: S / M-XL / XXL

PARAMETERS

Material	polyester	Type	automatic
Width	45 mm		
THREADS		Soft padding	thigh straps, shoulder straps
		Fall indicators	yes
Material	polyester	Attachment loop A/2	yes

CONNECTING AND ADJUSTING BUCKLES

Material ABS, High-carbon steel, galvanised

P-600 Safety harness for work positioning

NEW

ATTACHMENT BUCKLE

Material aluminium

CHEST BUCKLE

Material ABS, High-carbon steel, galvanised
