

## Trailer Mounted Blast Unit

This unit comes equipped with blast pot, on-board water tank and compressor, for all hazardous projects. The unit can also be used in non-hazardous environments where a breathe air compressor is not required.

### Key Features

- All in one self-contained unit, complete with blast pot, water tank and compressor
- Ideal for smaller projects where there may be space constraints on sites
- Can be used on remote sites / short duration projects, i.e line paint removal, graffiti, non-hazardous coating removal, restoration etc
- Cost effective, no need for separate hires of individual items as this is a single source solution

### Technical Specification

<b>Dimensions</b>		<b>Water Tank</b>	115 litres
<b>Capacity</b>	58 litres	<b>Water Consumption</b>	100 – 150ml per minute
<b>Height</b>	1530mm	<b>Grit Type</b>	Standard particle blast media
<b>Width</b>	2000mm	<b>Grit Consumption</b>	0.6 – 1kg per minute
<b>Depth</b>	3050mm	<b>Grit Refill</b>	Up to 2 hrs between refills
<b>Unladen Weight</b>	1026kg	<b>Air Supply</b>	90cfm
<b>Laden Weight</b>	1240kg (garnet)	<b>Air Supply Hose</b>	¾ inch
<b>Blast Media</b>		<b>Blast Hose Size</b>	1 inch
<b>25kg Garnet Bags to fill vessel</b>	4	<b>Blast Hose Max Length</b>	80m
<b>25kg Iron Silicate Bags to fill vessel</b>	3	<b>Blasting Pressure</b>	20 – 80psi
<b>25kg Glass Bags to fill vessel</b>	2	<b>Compressor Fuel Tank</b>	Diesel, 50 litres capacity
